

Fresh Quarterly Index

Fresh Quarterly Issue One – Skin Deep

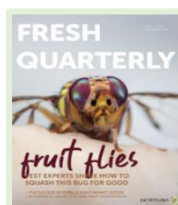

- Soil's Trojan horse8
- War on pests: The mass production of a biological wonder weapon12
- The oddity of red colour development in pears.....18
- How to achieve good red colour in apples and pears22
- The recipe for green colour in green apples24
- Research inventory26
- Yin and yang: Understanding the cold sterilisation of dual temperature plums28
- Farming's most difficult season30

Fresh Quarterly Issue Two – Thirst Trap

- What you need to know about orchard water use8
- Thirst trap – How much water do high performing apple orchards need10
- Stranger things – Invasive alien plants' coup of water catchment areas.....16
- Research Inventory–A list of this theme's projects and publications18
- Internal browning in 'Fuji'20
- When pink apples go brown23
- Research Inventory–A list of this theme's projects and publications26
- Making the desert bloom30

Fresh Quarterly Issue Three – Fruit Flies

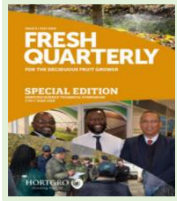

- Nip phytosanitary risk in the bud6
- Indigenous fruit flies: Keeping your orchard pest free8
- Research Inventory–A list of this theme's projects and publications12
- Rootstocks: Choose what is best for your crop14
- Rootstocks for stone fruit.....18
- Understanding rootstock evaluation.....20
- Research Inventory–A list of this theme's projects and publications24
- Forelle Early Market Access: Unlocking new value from an old cultivar26
- Research Inventory–A list of this theme's projects and publications28
- A meander along South Africa's CA storage road30

Fresh Quarterly Issue Four – Chemical Thinning of Pome Fruit

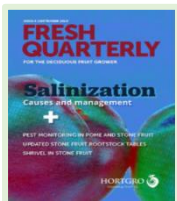

- A century of fruit thinning4
- Who's who in chemical thinners7
- How do the different chemicals thin?11
- A South African perspective on chemical thinners15
- Chemical thinners project outputs18
- Stopping the rot.....21
- Stem cankers and dieback project outputs24
- The sharpest tool in the shed27
- Penetrometer project outputs29

Fresh Quarterly Issue Five – Special Edition

- Reform holds the key to economic growth6
- To the last drop8
- Be savvy about salt10
- Below the surface.....12
- Train your trees for the future14
- From blossom to apple.....16
- Late bloomers18
- Less is not more20
- Fruit fly expert calls for new policies22
- Biological control of fruit flies.....24
- Land reform success stories26
- Some like it hot28
- Save money with scientific dosing.....30
- Maintain your net benefits32
- Data-driven farming.....34
- Rewriting the rules36
- The state of energy in South Africa38
- Parting ways with plastic40
- Minimising moisture loss in pears43
- Edible coatings.....46
- Put the brakes on decay.....48
- Exterminate grain chinch bugs.....50
- Dynamic fruit need dynamic storage52

Fresh Quarterly Issue Six – Salinization

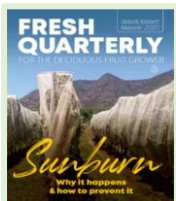

- Salinization6
- Getting ahead of salinization.....10
- Stone fruit rootstocks revisited12
- Getting more out of monitoring17
- Healthy tree, healthy fruit18
- Straightening out shrivel in plums22
- Turning up the heat on shrivel26
- Research inventory29

Fresh Quarterly Issue Seven – What’s Next for Plastics?

- What’s next for plastics?.....8
- Current and completed plastics projects10
- Sustainable plastic manufacturing12
- Plastic packaging in the fruit industry.....14
- Join the circular economy16
- Research inventory19
- False codling moth.....20
- Guide to the biology of false codling moth.....21
- Why you need an augmentorium24
- Waging war on moth malefactors26
- The false codling moth genome sequence28
- Know your tortricid moths31
- Research inventory33
- Looking to the future34

Fresh Quarterly Issue Eight – Sunburn

- Sunburn.....4
- Sunburn research summarised10
- Net essentials12
- A tale of two flies.....16
- Research Inventory19
- Going the distance20
- Internal browning in Cripps Pink.....22
- Keep your apples in the pink.....24
- Best post-harvest practices.....26
- Research inventory28
- A citrus perspective on Oriental fruit fly29
- Back to earth30

Fresh Quarterly Issue Nine – Research Showcase

- Comparing apples with apples4
- Getting to the root of salt tolerance.....9
- Water use in Japanese plums11
- Future-proofing pest management13
- The secret life of weevils18
- Polyphagous shot-hole borer.....20
- Solutions for superficial scald.....23
- Putting it in pictures28
- Drawing the line on plastic use30

Fresh Quarterly Issue Ten – Fruit Set Explained

- The fundamentals of fruit set6
- Hot and bothered.....10
- Five factors affecting fruit set12
- Forewarned is forearmed16
- Protect your crops with effective spray application20
- Time is money23
- How are dosages determined24
- The six-legged hitchhiker26
- Fumigation to combat phytosanitary pests.....28

Fresh Quarterly Issue Eleven – The Plant Material Issue

- A strong start.....6
- Here’s to your tree’s health.....8
- Get a handle on new trees10
- To pot or not12
- The Deciduous Fruit Plant Improvement Scheme14
- Bud to orchard17
- What can COVID-19 teach us about tree health?18
- Plum marbling.....20
- Getting to grips with plum marbling.....23
- What is pear stony pit26
- Figuring out the cause of pitted pears28
